Netwrix Change Tracker

Gain confidence in systems integrity

Netwrix Change Tracker enables organizations of all sizes to enhance their security posture by **hardening configurations, monitoring changes, and delivering superior forensic capabilities** that minimize the time and effort needed to identify the cause and scope of a security breach. The solution provides IT teams with real-time, comprehensive information on the security status of the entire infrastructure and eases the burden of passing compliance audits with CIS-certified reports.

ESTABLISH STRONG CONFIGURATIONS AND MAINTAIN SYSTEMS INTEGRITY

Establish solid configuration benchmarks across your vital systems driven by security best practices and maintain system integrity by stopping configuration drift.

REAL-TIME FILE INTEGRITY MONITORING (FIM) AND POWERFUL CHANGE CONTROL

Identify any unauthorized changes to critical systems in real-time, speeding up response times and reducing the risk of damage.

EASILY PROVE YOUR COMPLIANCE FROM A SINGLE DASHBOARD

Increase confidence in your security posture and demonstrate compliance by using comprehensive, built-in, and automated reports.

CUSTOMER FEEDBACK

Change Tracker's product architecture, rich feature set, and ability to implement the closed-loop change cycle have been very effective in securing our IT operations. Rather than use a lot of different security tools to perform the functions we need, we use Netwrix Change Tracker."

Gain Confidence in Systems Integrity

netwrix

Netwrix Change Tracker Key features

HARDEN YOUR SYSTEMS FASTER

Take the guesswork out of hardening critical systems with CIS-certified templates for standard infrastructure configurations.

REAL-TIME FIM

Actively watch for changes in critical systems and configuration files, protecting against contemporary cyber attacks and zero-day exploits.

IN-DEPTH CHANGE CONTROL

Significantly reduce change noise and put the spotlight on suspicious events, through integrations and planned change rules.

SYSTEM FILE AUTHENTICATION

Verify that critical system files are authentic by cross-checking with a database of over 10 billion file Reputations.

TRACK YOUR SECURITY POSTURE

Be confident that your infrastructure and sensitive information is safe by checking the status of your security and compliance posture at any time.

PASS COMPLIANCE AUDITS WITH EASE

Reduce the effort required to prove compliance by automating repetitive tasks using over 400 built-in CIS Certified reports.

HOW IS NETWRIX CHANGE TRACKER DIFFERENT?

SCALABILITY

Change Tracker scales to meet the needs of the largest and most complex infrastructures.

COMPREHENSIVE

Netwrix Change Tracker protects your servers, databases, VMs, containers, private and public clouds, and network devices.

LIGHTWEIGHT

Netwrix Change Tracker is completely agentless resulting in a negligible impact on system load.
