www.netwrix.com

## **EXECUTIVE SUMMARY**

This document presents the key results from an online survey of 1045 IT professionals conducted by Netwrix in October, 2019. Each respondent picked up to five top IT priorities for 2020 from the predefined list with an opportunity to add their own options. Survey demographics are provided at the end of the document.

The survey found no dramatic difference in IT priorities among organizations based on size or vertical. Key findings include the following:

Overall, data security was the top goal, followed by data privacy and raising cybersecurity awareness among employees. \_\_\_\_

Organizations also want to focus on improving IT operations through automation and software integration. Cloud migration continues to be a priority for organizations with more than 10,000 employees.

Digital transformation is important for organizations with more than 5,000 employees. Although it seems as if everyone is talking about the IT skills shortage and recommending AI as a silver bullet to dramatically improve cybersecurity, only a few respondents plan to focus on either educating their current IT employees or implementing AI-based solutions in 2020.

## **KEY FINDINGS BY THE NUMBERS**

of organizations named data security as their top IT priority for 2020.

**54%** of respondents plan to focus on automating manual tasks.

### **43**%

of organizations mentioned data privacy as their top goal.

**52%** of them are subject to privacy regulations.

of organizations plan to focus on addressing the skills shortage through education of existing IT personnel or talent acquisition. 33%

of organizations intend to focus on digital transformation, integrating their existing solutions and cloud migration projects; these goals are mostly relevant for larger organizations.

# MAJOR TRENDS

mentioned by most organizations

Unsurprisingly, data security is the top IT priority for organizations of all sizes, verticals and geographical locations. Every IT person, from IT/systems administrators to CIOs and CDOs, sees it as their top task for 2020.

### **91**%

of organizations in the retail industry see data security as their top priority and this also represents the highest concentration amongst all the verticals.

Not very long ago, data privacy was not even on the radar of most organizations. However, the introduction of data privacy-focused compliance regulations like the GDPR and the CCPA has made this task a priority for organizations worldwide.

### **63**%

of financial organizations plan to support data privacy projects in 2020.

# CYBERSECURITY AWARENESS

Changing employee behavior by raising awareness is seen as the key priority by smaller organizations and organizations from the educational and public sectors.

# COMPLIANCE

Adhering to compliance and privacy regulations is one of the top 10 priorities for the coming year but it is not at the top of the list for most organizations. This might indicate that compliance is no longer seen as a one-off, check-the-box task, but as an ongoing process.

### **60**%

of organizations with up to 1,000 employees plan to invest in employee security awareness.

### **42**%

of healthcare organizations see compliance as one of their most critical priorities.

Most organizations are still struggling to automate routine tasks. As such, automation is one of the top three priorities for organizations of all sizes and verticals.

### **59**%

of IT/systems administrators plan to spend time and money on automation.

# **COMMON TRENDS** mentioned by many organizations

Organizations of all sizes are interested in unlocking the full potential of digital transformation, especially enterprises with more than 5,000 employees.

Organizations continue to move their data and infrastructure to the cloud. The trend is evident in organizations of all sizes and verticals, but especially among larger enterprises, mainly in the manufacturing and retail verticals.

### 88%

of French organizations see digital transformation as their number one priority.

of manufacturing sector organizations are planning cloud migration projects for 2020.

Integrating systems simplifies internal processes, reduces operational expense and enables organizations to get more value from the software they have, since siloed IT solutions require individual management and separate resources.

### **44**%

of CIOs have integration projects on their bucket lists.

5.0

# **EMERGING TRENDS**

mentioned by fewer organizations

#### **EDUCATION OF CURRENT IT STAFF**

Organizations struggle to hire top IT and cybersecurity talent, so they see educating their current IT employees as a great option for addressing the skills shortage.

#### **TALENT ACQUISITION**

Organizations that want to address the skills shortage quickly prefer to invest in talent acquisition rather than education of internal IT personnel. This is not a widely emerging trend, but it is relevant for larger enterprises.

of organizations headquartered in the UK and 20% in the USA will invest in IT education.

of government organizations will hire additional IT staff. However, this is the highest percent amongst all verticals.

#### **KNOWLEDGE MANAGEMENT**

This trend is not widespread, but it is still relevant for organizations of all sizes, from small companies to large enterprises of 50,000 employees.

# **MPLEMENTATION OF AI**

Even though artificial intelligence dominates the headlines today, few organizations plan to deploy Albased solutions in 2020. The trend is most relevant for enterprise organizations.

of CDOs will dedicate effort to knowledge management.

of organizations with 10,000–50,000 employees plan to deploy AI.
